Sage Software offers a variety of business management solutions to small and mid-sized companies. As a Peachtree by Sage customer, you can appreciate the benefits of owning a Sage Software accounting system. But like many businesses, you may be seeking a more complete business management solution, or you may see growth on the horizon. If so, Sage MAS 90 – Peachtree Edition is the logical next step.

One of the many benefits of staying in the Sage Software family is an easy transition path. Sage MAS 90 – Peachtree Edition offers numerous tools that make your transition seamless, including the Conversion Guide and tutorial. Plus, our Conversion Specialists are experts with both Peachtree and Sage MAS 90, and they offer you exceptional support to ensure your business continues to operate smoothly.

Once implemented, it won't take long before you realize why Sage MAS 90 is recommended by more CPAs than any other business management software in its class. Sage MAS 90 boasts a modular design that allows you to start with a core accounting system, then add modules to suit your business requirements. Your business can thrive on this accounting and business management software. That's because, from accounting and distribution to e-commerce and customer relationship management, Sage MAS 90 – Peachtree Edition can expand to accommodate your business growth.

The advantages of staying in the Sage Software family are truly numerous. Read further to discover why Sage MAS 90 – Peachtree Edition represents the logical software choice for Peachtree customers who see growth on the horizon. For more information or to locate a Conversion Specialist near you, contact the Sage Software Migration Center at **877-530-5647** or visit:

"We thought Peachtree was great. But we really didn't know what we were missing until we automated the sales force and powered up with Sage MAS 90."

Dina Moyers
Controller
Kasco (Automotive Products
Distributor)

"The Job Cost module alone has justified switching to Sage MAS 90. Expenses are posted to specific jobs the moment they're entered into accounts payable. We can run a report at any time to check for profitability. The long-term benefit is that we are now much better at estimating labor costs, which represent our biggest expense, and can therefore bid with greater accuracy on future jobs."

Tom Zerkel
Office Manager
Sullivan Construction, Inc.

An Easy Transition

Moving from Peachtree to Sage MAS 90 – Peachtree Edition is an easy transition. With valuable implementation tools and services, including a helpful conversion guide, a tutorial and our award-winning support team, your move to this new software system will be smooth and worry free. Plus, with Conversion Specialists stationed throughout the country, you'll always have an expert nearby who can ensure that your system performs up to expectations.

A Broad Spectrum of Capabilities

While Peachtree is focused mainly on small and emerging businesses, Sage MAS 90 – Peachtree Edition boasts a more all-encompassing business solution. In fact, with its broad-ranging series of modules and industry-specific add-ons, the product possesses the functionality that small to mid-sized companies need to achieve a competitive edge. Choose to integrate as many modules as are beneficial to your business, then, as your company grows, you can expand your system with additional applications that suit your growing business requirements.

Decision-Making Power

Although Sage MAS 90 – Peachtree Edition can't make your business decisions for you, it systematically provides insights that make the decision-making process much easier. Whether you need to drill down to find detailed information concerning an individual customer or gain a holistic view of your organization, Sage MAS 90 – Peachtree Edition boasts a powerful reporting and analysis toolset that allows you to effectively make and support your critical business decisions.

Familiar User-Interface and Navigation

Sage MAS 90 – Peachtree Edition offers a familiar look and feel for Peachtree customers. Since Sage MAS 90 operates with a similar user interface and navigation tools, your staff will be able to get up and running with very little effort. Once implemented, your new system will help improve workplace productivity by streamlining your processes across all aspects of your business.

Advanced Integration

Like your current Peachtree software, the Sage MAS 90 – Peachtree Edition system integrates with many industry-leading productivity software packages, including Microsoft Word and Excel. If you've become accustomed to working with these tools, you'll be able to continue doing so, plus you'll have more advanced integration capability.

Software Stability

Sage Software has been expanding and adapting Sage MAS 90 since 1988 to accommodate changing business needs and to take advantage of new technologies. With more than 75,000 customers nationwide, the system is proven software that sets the standard for stability.

Ease of Use

Sage MAS 90 – Peachtree Edition is easy to learn, easy to implement, and easy to use. All of this can translate into productivity gains and cost savings. Customers familiar with the Windows operating system will feel right at home with our software, due to its Windows look and feel. Users can navigate quickly and effortlessly through their daily tasks using the Business Desktop, an Explorer-like interface, which allows users to organize their tasks based on their personal preferences.

Core Accounting

Like Peachtree, Sage MAS 90 – Peachtree Edition provides the accounting capability you need to successfully manage your finances. The five core accounting modules—General Ledger, Accounts Receivable, Accounts Payable, Bank Reconciliation, and Sage FAS Asset Accounting—provide the foundation upon which you can build a customized business management solution by seamlessly integrating with the other modules and solutions in the suite.

Distribution

Sage MAS 90 – Peachtree Edition streamlines the complete cycle of purchasing, stocking, and selling inventory. Our robust distribution toolset helps you improve customer service and loyalty, cut costs, and ultimately build profits. The system's distribution modules include: Inventory Management, Sales Order, Purchase Order, Bar Code, and Credit Card Processing.

e-Commerce

Sage Software is committed to providing you with ongoing software improvements as technology and business requirements evolve. That's why it comes as no great surprise that we're at the forefront of the rapidly expanding world of e-commerce. The e-Business Manager module for Sage MAS 90 – Peachtree Edition provides an affordable, out-of-the-box solution that can quickly and effectively bring your company into the online arena, while integrating seamlessly with your Sage MAS 90 distribution system.

Project and Resource Management

Sage MAS 90 – Peachtree Edition links and integrates with a series of modules that can lead your company to increased efficiency and profitability. By adding Sage Abra HRMS and Payroll to the core modules described above, you'll have a complete solution for tracking processes across all aspects of your business that affect your most vital asset—your employees. Or, if you are in a project-oriented business, the Job Cost module is an essential tool for keeping a close eye on job profitability.

Manufacturing

If your company builds the products it sells, making the move to Sage MAS 90 – Peachtree Edition is a logical choice. The software provides detailed and accurate tracking and reporting throughout the manufacturing process—from designing bills of materials to tracking work in process, to analyzing finished goods costs and profitability. Other advanced solutions are available for material requirements planning (MRP), bar coding, and more.

Business Intelligence and Integration Tools

Crystal Reports® and Business Alerts are valuable business intelligence and integration tools. A graphical report writer, Crystal Reports offers presentation-quality output for your accounting data. You can access template reports directly from a custom reports menu in each of our modules. Using Crystal Reports, you can send your customers professional-looking invoices, checks, quotations, sales orders, and statements. In addition, the Business Insights Reporter is a powerful yet easy-to-use tool for creating custom reports using a wizard-driven utility. Business Alerts can be added to the core of Sage MAS 90 – Peachtree Edition as yet another innovative tool designed to keep you “in the know.” Business Alerts acts as a virtual watchdog for your company's database. When a predefined condition is met (for example, if inventory drops below a specified level), Business Alerts will automatically send you an e-mail, so you can act accordingly.

CRM Integration

By linking Sage MAS 90 – Peachtree Edition to a customer relationship management (CRM) solution, your company can make significant strides in sales performance and customer service. Working independently, CRM applications increase efficiency in customer-centric processes, including tracking and communicating with existing and prospective customers. When linked and synchronized with one of the Sage Software CRM solutions, companies are able to integrate sales, customer service, and other critical departments that share information regarding sales opportunities, customer accounts, and more. With this capability, your customers will feel they've never been so well cared for.

Sage Software Migration Center

Business growth brings new challenges for your business. More employees. More revenue. More complexity. And, not the least of all, more demands on your systems. A top priority for Sage Software is to ensure our customers have the ability to easily migrate to software that accommodates these growth-related challenges. That's why we created the industry's first fully dedicated migration center.

The Sage Software Migration Center is designed to support your business as you consider new platforms or technology. Our Migration Specialists will help guide you through the conversion decisions that you're facing. We'll help you identify your internal software needs, plan for future growth, and understand the critical questions you need to ask yourself before you commit your time, budget, and resources to a software migration. There's no obligation and no risk. Our goal is simply to pass along the knowledge, proven tactics, and alternatives we've acquired while converting thousands of businesses to more powerful systems.

“I knew a lot about Sage MAS 90, having used it in a former position, then supporting it as a reseller, and now investing in it for my own company. That speaks volumes for my belief in the product...Every time we train someone new, they comment on how user-friendly Sage MAS 90 is. Whether we're using Sage MAS 90 for financial, manufacturing, or e-commerce management, we have the data we need at our fingertips in an intuitive, easy-to-configure format.”
